DATE: SEPTEMBER 8, 2017

SUBJECT: LONGFELLOW ELEMENTARY SCHOOL MODERNIZATION PROJECT  
LETTER OF RECOMMENDATION

To Whom It May Concern:

I have collaboratively worked with BHM Construction (BHM) as a Senior Project Manager on the San Francisco Unified School District 2011 Bond Program. I have found the BHM team to be a knowledgeable, competent, and a helpful team member serving the best interest of the project and the District, while leveraging their project management and construction experience to help everyone on the project team to be successful. I had the pleasure of working with BHM on the Longfellow Elementary School project (\$11,867,799) in San Francisco. The Longfellow project was a multi-phased (7 Phases) renovation of an existing 44,340 SF building and new addition of 770 SF teachers' lounge—including a new elevator—on a fully occupied elementary school. The project scope included extensive Structural upgrades while coordinating hazardous abatement and demolition, ADA upgrades, new curtain walls, and new HVAC and electrical upgrades, as well as site ADA upgrades and new student play yards.

I hope to have another opportunity to work with BHM Construction on a future project. They played a key role as a team member working *with* the District and the design team in meeting the aggressive project schedule and providing the district with a successful project.

Please consider this my strong recommendation for BHM Construction for your next project or program.

Sincerely,

William Chow, P.E.  
Senior Project Manager
